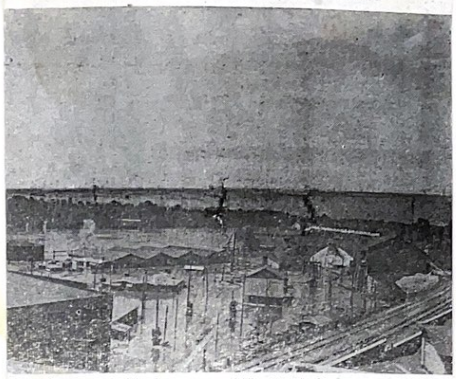
CWP Co. Mill Yard



Looking west, with the corner of No. 15 Machine room showing at left. Difficulties of handling material and shipping products of the mill may be imagined by noting this view of what is ordinarily a busy point in the mill transportation system.—Photo by C. E. Malcolm, CWP Co.

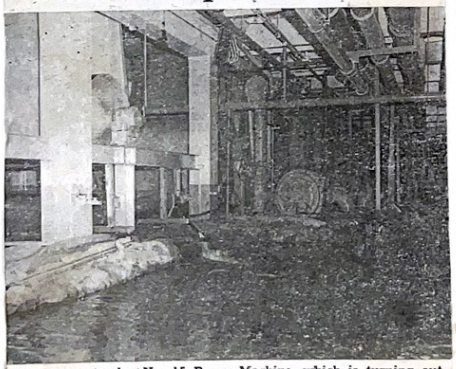
Lake Machine Shop

By wearing hip boots it is still possible to turn out necessary jobs in the Crown Willamette mill machine shop, using boats to transport heavy maferials. A bewildered carp was scooped up here in a basket a day or so after the water came in.—Photo by C. E. Malcolm, CWP Co.

Damp But Not Down

Dick Crippen and rubber boots at work in store room in defiance of invading river.—Photo by C. E. Malcolm, CWP Co.

Machine Operates Above



Basement tender No. 15 Paper Machine, which is turning out nearly 100 tons of paper daily in spite of high water. Sandbag dikes protect power machinery and pumps, running 24 hours a day, keep water level down.—Photo by C. E. Malcolm, CWP Co.
